

## CHECK LIST

### COMPREHENSIVE DIAGNOSTIC RECORDS FOR INVISALIGN

Panorex**	5 min	take and develop
FMX**	15-20 min	take and develop
Photographs**	10 min	take
Alginates (office record)	10 min	pour up in lab
2 bite registrations (CR/CO)	5 min	(CO = Align, CR = office)
Impressions (Align record)*	20-25 min	
Facebow	5-10 min	Mount models on articulator
<b>Total</b>	<b>70-90 mins</b>	<b>Retake impressions Built in</b>

**\*\* Duplicate sets for Align and office**

**\* Always take Align impressions first. If it fails as a final impression for Align, it most likely will still be good enough to replace your alginate impression. Thus saving the patient from having to get extra impressions.**
