Dear Gary,

It was a pleasure seeing you again for your cleaning and to discuss your dental needs. Stella, your chief concern is your missing upper right first molar and the esthetics of your remaining teeth. I reviewed a number of modalities with you and together we can incorporate these to fit your time and budget. I have divided your treatment into phases for easy comprehension.

1. Implant consultation.

HRK

Dr. Hamid Kazemi will evaluate your upper right quadrant for placement of a dental implant and possibly osseous grafting for bony support. Your dental implant will serve as an artificial tooth root to hold a porcelain crown. An implant generally needs 4-6 months to “bond” to your jawbone after initial surgical placement.

2. Invisalign records and treatment.

BG

At this one-and-a-half hour appointment my staff will take the following records for your Invisalign orthodontic treatment: impressions (2 sets), face bow, bite registration, photos, any necessary x-rays and other jaw measurements to allow me to CAT-scan your models and develop computer images of your jaw. I will then manipulate the computer images and fabricate a series of clear plastic aligners to straighten your teeth. You will need to wear your aligners 22 hours a day, changing into new aligners every two weeks. I expect to start your Invisalign treatment about 5 weeks after you present for your records visit. Your total treatment time is expected to be 8-10 months.

3. Implant placement.

HRK

Dr. Kazemi will place an endosseous implant in area #3 (your upper right 1st molar) while you are undergoing your Invisalign treatment. The implant will integrate with your bone and be ready to restore shortly after your orthodontic treatment is completed.

4. Restorations.

BG

I will restore the following teeth:

- # 20 composite and pulp cap
- # 3 implant crown
- #12 porcelain-fused-to-gold(PFG) crown and build-up
- #18 composite (large) and pulp cap
- #30 PFG crown
- #31 PFG crown
- Night guard.

Gary, I expect the fee for treatment in my office to be \$XX,XXX. The fee includes the Invisalign records and treatment, provisional crowns, permanent crowns, restorations and night guard. This fee does not include any other dental treatment, although I do not anticipate any other treatment to be necessary.

This fee also includes any related procedures necessary for a period of one year after we complete your treatment. Clinical studies have show this to be a safe amount of time to identify any latent problems that may exist.

At the time of your diagnostic records for Invisalign visit a payment of \$XXX is desired and the balance for your Invisalign treatment (\$X,XXX) to be paid over 8-10 months. The payment for your restorative treatment (\$X,XXX) to be paid in three installments of approximately \$X,XXX. My financial coordinator, Carla Mahieu, will gladly assist you in budgeting and financial concerns.

My goal is to provide you with the best dental care and quality of service while making treatment affordable. I can assure you that at the end of this scenario, you will have both the comfort and confidence you have sought to restore your smile.

Sincerely,

Brian Gray, DDS
