

Hello Mary Sue,

Thanks for coming in the other day to review your orthodontic treatment. I am really pleased with our expected result. I have performed a few other small modifications to your case to improve things even more without adding on to your overall treatment time. In a about a year you should achieve the beautiful smile you've always wanted. Per our conversation, I have attached an avi. file (movie) of your planned tooth movements. Because of the size of the file I have sent two other emails with avi. attachments that show other views. You can play the movies by simply clicking on the arrow on the bottom of the screen.

I look forward to seeing you on January 10th at 11:00 am.

Best wishes,
